Tutorials and Survey Lectures
WATA 2010

Tutorials

P. Gastin: "On quantitative logics and weighted automata"

K. Larsen: "Extensions of timed automata: verification and validation of real-time and embedded systems"

M.-J. Nederhof: "Equations for weighted grammars"

Survey lectures

C. Baier: "Probabilistic automata and verification"

P. Bouyer-Decitre: "Energy management in timed systems"

M. Ćirić: "Fuzzy and weighted automata: commonalities and differences"

Z. Ésik: "Complete axiomatizations of the behaviour of finite automata"

D. Kuske: "Weighted automata and automatic structures"

A. Maletti: "A gentle introduction to weighted extended top-down tree transducers"
