

Curriculum management with Maius CIS (MCIS)

Quintin Siebers
Morpheus Software

TMRA 2007 -- open space sessions 11-10-2007

Curriculum management

- Management of everything that is taught at school and administration surrounding it
- Examples:
 - Courses
 - Goals
 - Study topics
 - Users (managers, teachers, students)

Maius

- Project centered education
- Developed by GeoActive b.v. in the Netherlands
- Several products helping in the management of the project centered education
- MCIS the first topic map oriented tool they offer

MCIS

- Maius Curriculum Information System
- Running project of Morpheus Software
- Keep track of the education's goals and curriculum
- Help a school in starting project centered education
- Improve and offer cooperation between schools
- Supplies a user-friendly interface using topic maps, without the user knowing that it is!

MCIS - Kamala

- Uses the kamala framework
- Different style
- Full authorization model
- Authorization specific content

- All specified within the topic map!
